

Assignment 2: Personal Portfolio Website with HTML, CSS, and JavaScript

Objective:

You are required to design and develop a personal portfolio website using **only HTML, CSS, and JavaScript**, inspired by the clean and effective structure of <https://www.ethangardner.com/>. The goal is to focus on **semantic HTML**, **modern layout techniques (Flexbox & CSS Grid)**, and **web performance optimization**.

Task Requirements:

1. Website Structure

- Create a personal website with **at least 3 main pages**:
 - Home
 - About Me
 - Projects or Portfolio
- Use semantic HTML tags (<header>, <main>, <section>, <footer>, etc.)
- Use **only HTML, CSS, and JavaScript** — no frameworks or libraries

2. Layout & Design

- Use **CSS Flexbox** and **CSS Grid** to build responsive layouts
- Implement responsive design using media queries
- Ensure the website works well on both desktop and mobile devices

3. Content

- Include a short biography, a professional profile image, and at least 2 project samples
- Add a navigation menu and links to external profiles (e.g., GitHub, LinkedIn)

4. Lighthouse Audit

- Use **Google Lighthouse** (in Chrome DevTools) to evaluate your website
- Submit a screenshot or report showing your scores in:
 - Performance
 - Accessibility
 - Best Practices
 - SEO
- Your goal is to achieve **90+ in all categories**, with extra credit for 100s

5. Submission

- Submit:
 - Your full website files (.html, .css, .js) in a zipped folder
 - A screenshot/PDF of your Lighthouse audit
 - A 1-page reflection on your design process and improvements made based on audit results

Rubric

Criteria	Excellent (4)	Good (3)	Satisfactory (2)	Poor (1)
Website Structure	Complete with 3 main pages, all using semantic HTML effectively.	Complete with 3 main pages, mostly using semantic HTML.	Minimum of 3 pages but inconsistent use of semantic HTML.	Missing essential pages or lacking semantic structure.
Layout & Design	Fully responsive design using Flexbox and CSS Grid, well-implemented media queries.	Mostly responsive with effective use of Flexbox and CSS Grid.	Some responsive design but minimal use of Flexbox and CSS Grid.	No responsive design, poor layout structure.
Content	Comprehensive biography, professional image included, and multiple projects showcased.	Satisfactory biography and image; at least 2 projects included.	Basic biography and image included; less than 2 projects showcased.	Incomplete or missing content sections.
Navigation	Clear, intuitive navigation with links to external profiles correctly implemented.	Navigation is clear but may have minor issues with external links.	Navigation is present but confusing or incomplete links to external profiles.	Navigation is missing or very difficult to use.
Lighthouse Audit	Achieved 90+ scores in all categories; evidence submitted meets expectations.	Achieved 90+ in most categories with evidence of audit submitted.	Achieved below 90 in multiple categories; evidence submitted but not comprehensive.	Failed to submit audit or scores are significantly below expectations.
Reflection on Design Process	Insightful reflection detailing design choices and thoughtful improvements based on audit.	Reflection present and discusses some design choices and improvements made.	Basic reflection but lacks depth in discussing choices and improvements.	No reflection submitted or severely lacking detail.
Overall User Experience	Exceptional usability and user experience; intuitive interaction throughout.	Good usability with minor issues in interaction.	Usability is acceptable but includes several issues that hinder experience.	Poor usability; interaction is frustrating or confusing for the user.
